June 30, 2005

(Unaudited – Prepared by Management)

1. NATURE OF OPERATIONS AND GOING CONCERN

The Company is an exploration stage company engaged principally in the acquisition, exploration and development of mineral properties. The recovery of the Company's investment in mineral properties is dependent upon the discovery of economically recoverable reserves, the ability of the Company to obtain financing to complete development and the future proceeds from the disposition of those reserves.

These consolidated financial statements have been prepared on a going concern basis, which contemplates that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of business. As at March 31, 2005, the Company has a working capital of \$1,294,441 and an accumulated deficit of \$21,393,061. The Company's ability to continue as a going concern is dependent on the ability of the Company to raise equity financing and the attainment of profitable operations.

These consolidated financial statements do not give effect to adjustments that would be necessary to the carrying values and classification of assets and liabilities should the Company be unable to continue as a going concern.

2. SIGNIFICANT ACCOUNTING POLICIES

The accounting policies used in the preparation of the accompanying unaudited interim financial statements are the same as those described in the annual consolidated financial statements and the notes thereto for the year ended December 31, 2004, with the exception of the change in accounting policy for stock based compensation, as disclosed in Note 2(b). In the opinion of management, all adjustments considered necessary for fair presentation have been included in these financial statements. The interim consolidated financial statements should be read in conjunction with the Company's consolidated financial statements including the notes thereto for the year ended December 31, 2004.

(c) Use of Estimates

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of the assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those reported.
